PRESS RELEASE

FOR IMMEDIATE RELEASE

University Nevada, Reno Selects Cayuse for Research Proposal Development

Research Enterprise Adopts Industry-Leading Cayuse424 for Improved Funding Productivity and Electronic Submission to Grants.gov

Portland, Ore., Nov. 1, 2007 – Cayuse, Inc., an industry-leading provider of research proposal solutions for educational and research enterprises, announced that the University of Nevada, Reno (UNR) has chosen Cayuse424 for proposal development and submission to Grants.gov.

UNR will deploy Cayuse424 to its research community, providing an environment to streamline proposal creation. With an industry-exclusive four-tier validation engine, researchers identify and eliminate proposal errors on the fly, producing properly formatted and validated proposals that are ready for electronic submission. A true Web-based application, Cayuse424 deploys quickly, and works on both Macintosh and Windows platforms, yielding immediate accessibility to the entire research community.

“It was important to us that we adopt a solution we could launch quickly and which has minimal support and implementation overhead,” said Dr. Mark Brenner, Vice President of Research at UNR. “With Cayuse’s hosted solution and industry reputation, we are confident we made the best selection for the University.”

Cayuse424 also contains Web services APIs that allow easy export of proposal data to other reporting and tracking systems.

“Research organizations are seeking ways to reduce the labor and costs associated with applying for research grants,” said Christian Harker, president of Cayuse, Inc. “Our goal has been to provide the U.S. research professional with the best system for developing and submitting proposals to the federal government, so that the money for science flows to where it can do the most good.”

About Cayuse, Inc.

Cayuse, Inc. delivers an enterprise solution designed to improve federal research funding success at educational and research institutions. The company streamlines the proposal development process, reduces costs and administrative overhead, and improves institutional research competitiveness.

Customers include the University of Wisconsin at Madison, University of Massachusetts at Worcester and The Ohio State University. Founded in Portland, Oregon in 1992 by Christian Harker, Ph.D, Cayuse employs software engineers, marketing, and sales personnel from its Portland and Boston-area offices.
