PRESS RELEASE

FOR IMMEDIATE RELEASE

Yeshiva University Chooses Cayuse Proposal Development Solution

Leading NIH Funding Recipient Migrates from Downloadable Forms to Web-based System for Preparing Proposals and Submitting to Grants.gov

Portland, Ore., January 15, 2008 – Cayuse, Inc., a provider of grant proposal solutions for educational and research enterprises, is pleased to announce that Yeshiva University is adopting Cayuse424 as its central proposal development and management system. Yeshiva will transition from using standalone forms to Cayuse424, which allows researchers and research administrators to develop and validate federal research proposals via a Web browser. Additional improvements in productivity will result from the ability to submit error-free research proposals directly to Grants.gov.

“While the downloadable Pure Edge forms served us well in the past, we recognized that the time is right to move to a Web application and a system-to-system model for proposal development and submission,” said Charlie Hathaway, Director of the Office of Grant Support at Yeshiva’s Albert Einstein College of Medicine.

“Proactive research organizations are searching for ways to improve efficiency and oversight of the research proposal process,” said Chris Harker, president of Cayuse, Inc. “In a time of increased competition for research dollars, institutions need to use every advantage available. We’re pleased to have the opportunity to help Yeshiva University move to our system which is designed to support the collaborative and exacting nature of research.”

Cayuse will deploy Cayuse424 at Yeshiva and conduct training in time for researchers to begin preparing and submitting proposals for the February 5, 2008 NIH deadline.

About Cayuse, Inc.

Cayuse, Inc. (<http://www.cayuse.com>) delivers an enterprise solution designed to improve federal research funding success at educational and research institutions. The company streamlines the proposal development process, reduces costs and administrative overhead, and improves institutional research competitiveness. Customers include the University of Wisconsin at Madison, University of Massachusetts at Worcester, The Ohio State University, and the University of Texas System. Founded in Portland, Oregon in 1992 by Christian Harker, Ph.D, Cayuse employs software engineers, marketing, and

sales personnel from its Portland and Boston-area offices. For more information, please visit www.cayuse.com.

About Yeshiva University

Founded in 1886, Yeshiva University brings together the heritage of Western civilization and the ancient traditions of Jewish law and life. Yeshiva's Albert Einstein College of Medicine is consistently among the nation's leaders in basic research support from the National Institutes of Health (NIH) and has earned "Center of Excellence" designation from the NIH in six major biomedical disciplines—brain research, cancer, diabetes, liver disease, AIDS and sickle-cell disease—as well as for its Bronx Center to Reduce and Eliminate Ethnic and Racial Health Disparities.
